Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the general idea of using a torsion bar to measure tension, stress, or weight is known; the reference to Breed et al (US # 6,242,701) shows a torsion bar load cell (Fig. 22E) in one embodiment for measuring weight in an automotive seat (Col. 33, lines 16-22). The general idea of using non-sensing torsion bars as a spring that is part of a suspension of a vehicle seat is also known. However, there is no motive to mount a torsion bar weight sensing system in an automotive seat where the torsion bar extends between first and second floor brackets and is rotatably supported thereby, and with first and second laterally separated linkage arms coupling a frame of said seat to the torsion bar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randy W. Gibson whose telephone number is (571) 272-2103. The examiner can normally be reached on Mon-Fri., 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamand Cuneo can be reached on (571) 272-1957. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
